- Spatial Management of individual projects;
- Calculation and setting out of design information;
- Undertaking detail surveys for design purposes;
- Conducting as-built and conformance surveys;
- Produce plans and reports for recording purposes;
- Assist in the calculation of quantities for tender submissions;
- Assist project team in achieving goals of project construction program;
- Ensure ongoing verification of quality issues in accordance with Project Quality Plan as well as in accordance with good survey practice;
- Investigate and encourage innovation;
- Preparing monthly (or as required) quantity reports for payment purposes;
- Maintain awareness of project survey budget and proactively manage to deliver services within budget constraints;
- Maintain and care for all equipment as issued;
- Adhere to appropriate calibration procedures;
- Communicate as required with project team members to establish and program on a day to day basis all survey needs and priorities;
- Participate in open communication regarding any issue project team members may wish to discuss or require assistance with;
- Demonstrate on a daily basis personal behaviours that uphold company values with a view to driving these values throughout the company;
- Maintain productive relationships with project team, subcontractors, consultants and community in line with company objectives;
- Manage and develop work performance including maintenance of continuing skills development;
- Deliver engineering survey services that meet the needs of all stakeholders;
- Encourage an environment of sharing knowledge and ideas to ensure continuous improvement within the project team and
- Create and maintain strong working relationships at appropriate levels within customer organisations.

The ideal candidate will have:

- Diploma in Surveying or equivalent;
- Drivers license;
- Construction Industry Induction;
- Minimum 2 years' experience in a similar role;
- Competent computer skills (MS Word, MS Excel, MS Outlook);
- Competency in Competency in civil software, preferably 12D Model;
- Competency in use of robotic total stations, preferably Leica and
- Competency in use of GPS equipment, preferably Topcon.
